

ADJUSTABLE CLAW PRY BARS

These versatile adjustable claw pry bars feature a double lock mechanism which allows for easy angle selection with extra strength hold.

The handles have been constructed using high quality CR-V and the heads using CR-MO.

Adjustable claw pry bars are one of the newest designs available and have become a tool box favourite due to their versatility. The adjustable claw can easily be adjusted and locked at the preferred working angle - this includes straight or bent claw, eliminating the need for a second claw.

Features:

- Double push lock
- Easy angle selection
- 12 locking positions
- 180° angle head sweep
- Robust construction
