

CHAMFER-PRO - EXTERNAL DEBURRING CHAMFER TOOL

Easy to use with a standard drill, the Chamfer-Pro is made from high carbon alloy steel and is suitable for use on a wide range of materials including stainless steel, hardened steel, mild steel, copper, brass, wood, fibreglass and plastic.

The Chamfer-Pro is great for removing burrs and ridges from bolts, pipes or threaded rods. The Chamfer-Pro is designed to prevent sparks, burns and cut hands, helping you work faster and safer. When used properly, the tool does not overheat the work piece. Threads are also sheared off, not folded over, as may happen when using a grinder.
